

**Amendments to the Claims**

No changes are made to the claims. All pending claims are reproduced below.

1. (Previously Amended) A system for a telephone, comprising:
  - (a) a mechanical device associated with a conversation element;
  - (b) a memory, coupled to the mechanical device, for storing an internal conversation element representing an audible utterance for a remote listener in an ongoing conversation; and
  - (c) a processor, coupled to the memory and the mechanical device, for generating the audible utterance in response to a user interaction with the mechanical device and the conversation element.
2. (Original) The system of claim 1, wherein the mechanical device includes a first button.
3. (Original) The system of claim 1, wherein the processor includes an audio generator.
4. (Original) The system of claim 1, further comprising:
  - (d) an impedance matching circuit coupled to the processor.
5. (Original) The system of claim 1, further comprising:
  - (d) an earpiece, coupled to the processor, for receiving the audible utterance and a voice of the remote listener.

Appl. No.: 09/658,612  
Amdt. dated: April 19, 2004  
Reply to Office Action of January 30, 2004

6. (Original) The system of claim 1, further comprising:

(d) an audio output for coupling to a mobile telephone input.
